To the FCC:

This purpose of this letter is to urge the FCC to reject NAB's petition 04-160. I am a recent subscriber to XM satellite radio. I have enjoyed to the programing options XM offers. I find the traffic and weather stations perticularly valuble. The information these stations provide is acurate and timely and unavalible on public radio. As a United States citizen I am a firm believer in the liberties the Constitution affords me. I am appalled by the fact that the United States Congress still sells my freedoms to the highest bidder by allowing organizations such as the NAB to restrict and censor what I can listen to. As an adult United States citizen I belive no person, organization or even the United States Government has the right or ability to censor a private service that I am willing to pay for.

With respect,

Peter Gacek
